Unleashing Nature's Potential

Easy Grow Coir Wattle®

EasyGrowCoirWattles® are excellent solutions for erosion control, bank stabilization, and stream restoration. Constructed from all-natural materials (interior made from coir fibre, exterior made from coir twine), our coir wattles create a natural barrier that can reinforce your location while effectively filtering water. Their combination of strength and filtration makes them a common choice for use in a range restoration and construction site activities.

The Coir Wattle prevents unnecessary erosion on slopes or run off from construction sites and in other commercial applications such as in vineyards. The wattle filters over land water, trapping sediment. It is great as a temporary sediment control product.

Coir Wattle Technical Specifications:

Diameter	6 in (15 cm)	9 in (23 cm)
Length	10 or 20 ft (3.05 or 6.10 m)	10 or 20 ft (3.05 or 6.10 m)
Weight	1.5 lbs/ft (2.23 kg/m)	3.0 lbs/ft (4.46 kg/m)
Density	7 lbs/ft ³	7 lbs/ft ³
Inner Core	Double Cleaned Unsorted Coir Fibre	Double Cleaned Unsorted Coir Fibre
Netting	Coir Twine with Knotted Junctions	Coir Twine with Knotted Junctions
